

Health Data & Evaluation Division

Services & Programs

Communicable disease and epidemiology staff engage in the prevention, investigation and control of reportable diseases and outbreaks. Other staff members manage and coordinate the Lincoln Medtropolitan Medical Response System (LMMRS) and Southeast Nebraska Medical Response System (SEMRS) grants. Those grants are used to acquire resources as well as plan and prepare responders and hospitals for public health emergencies throughout the 16-county region of southeast Nebraska.

Data on health status, including births and deaths and lifestyle and risk behaviors, are collected and maintained by our Epidemiology/GIS staff members. Data and reports may be found by clicking the “Health Data and Reports” link below or the “QUICK FACTS” link to the right of the Services and Programs header above. Later and more up-to-date data are available and have been produced in dashboards that are not yet available on our web pages. Please feel free to contact us (402-441-6270) for the latest vital statistics, BRFSS or YRBS survey data.
